University of Denmark, DK-8200 Århus N, Denmark

Abstract:

From late January to early February 17 participants from mainly European NRLs for Fish Diseases participated in an EURL training course in Aarhus, Denmark. Two modules were offered lasting from four to five days. The first module focused on “Molecular techniques for identification of listed fish diseases”, and the second module focused on “General Virology and immunochemical methods”. The content of the modules are presented as well as responses from the participants given on the evaluation scheme handed out. As the course is set up to help you improve your laboratory skills and to harmonize the methods used we will ask you for ideas for next year’s course. So please have your ideas ready.
